

# TRAIN THE MODEL ON IBM

## Register & Login To IBM Cloud

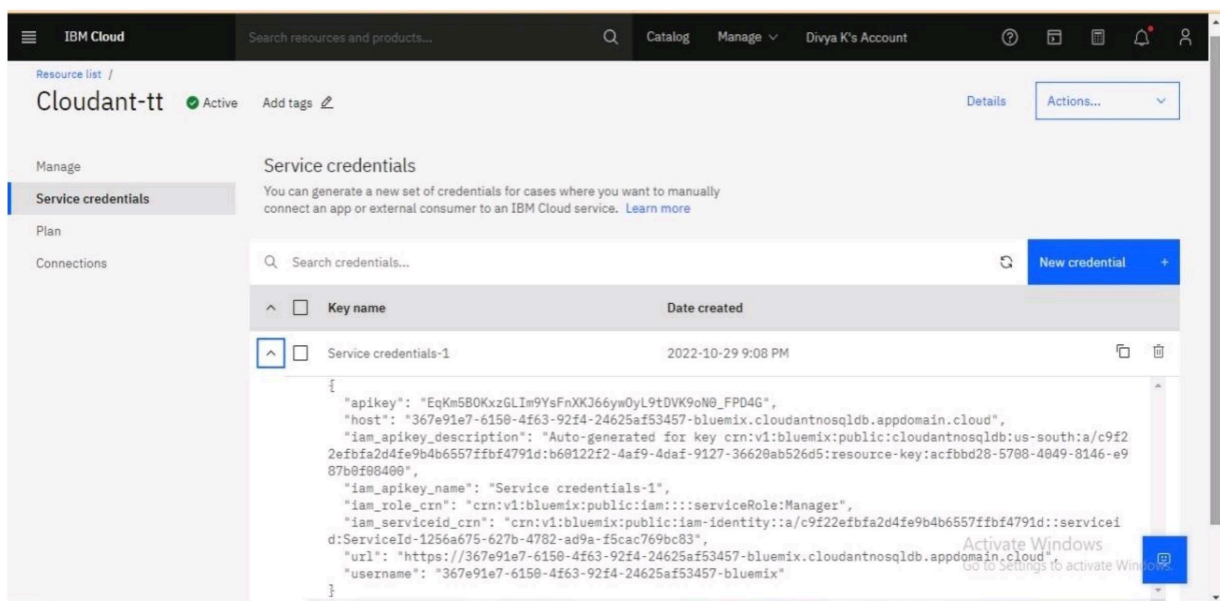

## Create Service Instance

- Log in to your IBM Cloud account.

## Creating Service Credentials

## Launch Cloudant DB

The screenshot displays the IBM Cloud console interface. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Divya K's Account). The main content area shows the 'Cloudant-tt' resource, which is 'Active'. The 'Overview' tab is selected, displaying deployment details such as CRN, Location (Dallas), External endpoint, and Authentication methods (IBM Cloud IAM). A 'Launch Dashboard' button is visible. Below the details, there's a section for 'Activity Tracker event types' with a 'Management' dropdown and a 'Save' button. The bottom part of the image shows a document viewer for a database named 'my\_db'. The viewer displays a table with columns 'id', 'key', and 'value'. Two documents are listed, each with a unique ID and a JSON value. The interface also includes a sidebar with navigation options like 'All Documents', 'Query', 'Permissions', 'Changes', and 'Design Documents'. A 'Log Out' button is at the bottom left. A 'Create Document' button is at the top right of the document viewer. The status bar at the bottom indicates 'Showing document 1 - 2' and 'Documents per page: 20'.
